Agile

► Transformation & Change Agile

SERVICE

- Implementation of Agile methodologies to improve project delivery and adaptability.
- Agile transformation across teams using SAFe, Scrum, or Kanban frameworks.
- Coaching and upskilling teams to enhance Agile maturity.

APPROACH

- Conduct Agile maturity assessments and develop an adoption roadmap.
- Train teams in Agile principles, frameworks, and ceremonies.
- Embed Agile coaches to drive cultural and operational change.

USE CASES

- Implementing Agile ways of working within organisations.
- Scaling Agile across multiple teams using SAFe frameworks.
- Improving product delivery efficiency and stakeholder engagement.
- Individual Agile resources/teams deployed in existing client teams.

KEY FEATURES

- Adoption of Agile methodologies (Scrum, Kanban, SAFe).
- Continuous delivery and iterative development.
- Agile coaching and capability building.

TOOLS

- JIRA, Confluence, Trello, Azure DevOps, Miro.

STRUCTURE & DURATION

- Typically, a team of a Product Owner, Agile Coaches, Scrum Masters and Delivery teams.
- Varies; Agile transformations typically take 6 to 18 months.

OUTPUTS & DOCUMENTATION

- Agile roadmaps, sprint plans, and backlog prioritisation documents.
- Facilitated retrospectives, and velocity tracking reports.
- Agile governance frameworks, SAFe transformation strategies, and team capability assessments.

SKILLS / KNOWLEDGE

- Agile frameworks (Scrum, SAFe, Kanban).
- Agile coaching, backlog management, and sprint planning.
- Organisational change management and continuous improvement.
